PROFESSIONAL SUMMARY

IT support professional with front-line technical experience at Spark NZ, first point of contact for device, network, and connectivity problems across mobile, broadband, and digital services. Computer Science graduate with a foundation in Windows, networking, and systems administration, backed by a home lab running Active Directory and Group Policy. Good at working out what a problem actually is before fixing it, and at explaining the fix to people without a technical background. Studying CompTIA A+.

CORE COMPETENCIES

Windows Troubleshooting

Active Directory & Group Policy

Microsoft 365 Administration

Networking & DNS

Incident Logging & Escalation

Customer Communication

Remote Access & VPN (Tailscale)

Linux & SSH

WORK EXPERIENCE

Spark NZ

2023 to Nov 2024, Jul 2025 to Present

Customer Advisor

Auckland, NZ

- First point of contact for device, network, and connectivity issues across mobile, broadband, and digital services, resolving problems in real time.
- Logged and tracked customer issues through to resolution, keeping people updated and escalating where needed.
- Explained technical problems clearly to non-technical customers; satisfaction scores rose 30% over my time in the role.
- Handled Microsoft 365 account access, email configuration, and Windows troubleshooting.
- Completed internal qualifications toward shift lead, taking on added responsibility for stock intake, transfers, and dispatch.

PROJECTS

Active Directory & Group Policy Home Lab

2026

Built a Windows Server 2022 domain controller and Windows 11 client in VirtualBox, running AD DS and DNS on a lab.local forest. Created OUs, security groups, and users; ran helpdesk drills including password resets, account lockouts, and provisioning and deprovisioning. Diagnosed a Group Policy object that silently wasn't applying using gpresult /r, tracing it to a computer object left in the default Computers container rather than the linked OU.

Windows Server 2022, AD DS, DNS, Group Policy

Remote Access & Wake on LAN

2025

Set up a Raspberry Pi as a 24/7 relay for Wake on LAN and remote desktop, using Tailscale to build a private VPN across laptop, phone, PC, and Pi. Configured BIOS-level wake and Windows network adapters end to end.

Raspberry Pi, Tailscale, Windows

Pi-hole: Network-wide DNS Filtering

2025

Set up network-wide DNS filtering on a Raspberry Pi 3B, configured and managed over SSH and Linux CLI, with the web admin interface locked down.

Raspberry Pi 3B, Linux, SSH

Divaria: Live Client Site

Live Site

Built and deployed a live client website, hosted on AWS Lightsail. divaria.co.nz

AWS Lightsail

EDUCATION

Bachelor of Science, Major in Computer Science [University of Auckland](#)

2021 to 2024

Cyber Security (A), Business Systems Analysis (A), Human-Computer Interaction (A), Information Security in Business (B+), Data Communications and Security (C+)

CERTIFICATIONS

CompTIA A+ (220-1201)

[Self-Study, In Progress](#)

SKILLS

IT & Infrastructure: Active Directory, Group Policy, Windows Server 2022, Windows 11, DNS, Networking, VirtualBox, Linux, SSH, Tailscale, Raspberry Pi, Microsoft 365

Support: Troubleshooting, Incident logging, Escalation, Remote desktop, Hardware and software support
