SUMMARY

Customer-facing IT professional with hands-on technical support experience at Spark NZ. CS graduate with a foundation in networking, systems, and security. Self-initiated cloud deployment and DNS filtering projects demonstrate practical initiative. Currently studying toward CompTIA Security+.

EXPERIENCE

Customer Advisor

April 2023 – Present

Spark NZ

- Provided technical guidance to customers, ensuring solutions tailored to their needs.
- Translated complex technical concepts into simple explanations, leading to a 30% increase in customer satisfaction.
- Shadowed data scientists and engineers, expanding understanding of data analytics and network security.
- Logged and tracked customer issues ensuring resolution within timeframes

Sales Development Representative

April 2026 – Present

Hevinsoft Limited - Cloud Technology

- Conducting outbound lead generation for a NZ cloud technology company, qualifying prospects based on technical fit.

PROJECTS

Client Website & Cloud Deployment

2025

Divaria · divaria.co.nz · github.com/realiru/Divaria

- Designed and developed a custom React and JavaScript landing page for a NZ vintage jewellery business.
- Self-hosted on AWS Lightsail, independently managing domain configuration, server setup, and cloud deployment end-to-end.

Pi-hole - Network-wide DNS Filtering

2025

- Deployed Pi-hole on a Raspberry Pi 3B via SSH and Linux CLI for network-wide DNS filtering and web admin security.
